1. Cold storage plant in Stralsund

25X1

- a. Construction work on a cold storage plant at the harbor was started in mid-May 1954. Plans call for the erection of a reinforced concrete building with the employment of flat slab construction (Platzdeckenkonstruktion) which necessitates the use of large quantities of wood. The two wings of the L-shaped plant will be 50 to 60 meters and 15 to 20 meters long, and about 20 meters wide.
2. 150 to 200 workers, members of the Bau-Union Kueste, were employed; only Bau-Union workers with special permits were allowed to enter the construction site which was kept under constant guard.
- c. The date which was set for the completion of the plant was 1 November 1954; however, it was expected that only the framework would be finished at that time.

2. Sewage-treatment plant in Stralsund: An extensive installation was being built. Construction costs were estimated to amount to 3,000,000 DME.3. Cold storage plant in Tribsees:

- a. A cold storage installation of the Jantzen firm was located in the suburbs of Tribsees. Construction work for doubling its space had already been started. In September 1954, the plant was 40 meters long and 30 to 35 meters wide, and consisted of a basement and two stories. The minimum temperature in the enlarged plant will be minus 7 degrees centigrade.

4. Sewage-treatment plant in Glowe (Ruegen Island): A large plant was constructed in 1953 sufficient to service a community of 15,000 to 20,000 inhabitants; Glowe, however has a much smaller population.

5. Ambulatory clinic in Glowe: Construction work was started in 1953 and completed in July 1954. The structure had three stories and contained forty rooms which is in excess of the needs of Glowe.
6. Barracks in Glowe: Barracks have been renovated and connecting roads have been repaired.
7. Water-works in Staphel (Ruegen Island): A water-works for Sassnitz was being constructed. Construction will cost about 800,000.00 DEM.
